SUMMARY

Senior Product Designer with 7+ years across EdTech, retail AI, fintech and medtech. I own design systems, gamification and sound UX for products used by millions, and ship measurable outcomes — including a redesigned purchase flow that won its A/B test (**ARPU +5%, conversion +7%**). I increasingly apply AI to design workflows: a Figma design-system linter that **won a developer hackathon**, AI-assisted color-system cleanup, and a design system ported into Replit as React components the whole team now prototypes with.

CORE SKILLS

Product Design · UX/UI Design · Design Systems · Prototyping · UX Research · A/B Testing · Interaction Design · Gamification · Sound UX · Data Analysis · Figma · FigJam · Adobe Photoshop / Illustrator / After Effects · iOS & Android · AI-assisted design tooling (Cursor, Replit, Figma MCP) · Jira / Confluence

EXPERIENCE

Uchi.ru Sep 2023 – Present
Senior Product Designer · Moscow (remote)

- Designed a new purchase flow that won its A/B test — **ARPU +5%, conversion +7%**.
- Ported the design system into **Replit as React components** — the whole design team now builds prototypes there, often without drawing in Figma.
- Used AI (Cursor + Claude) to consolidate a bloated legacy/A-B-test color system into a systematic palette and tokens in **~3 hours instead of days**.
- Systematized multimodality (voiceover, sound design) and owned **sound UX** across the product; shipped features that grew kids' social activity.

Ailet Jun 2021 – Sep 2023
Product Designer · Moscow

- Designed an analytics web platform and a mobile field app for merchandisers and auditors (AI-vision retail SaaS used by global CPG brands).
- Ran in-field UX research with supervisors, merchandisers and auditors; introduced UX metrics into the delivery process.
- **CSAT/CSI +5 pp** after redesign; **−8%** interface-related support tickets; sustained growth in field task-completion rate.

Ak Bars Digital Technologies (fintech) Jun 2020 – Jun 2021
Product Designer · Kazan

- Designed the investments section inside the banking app and a scalable UI architecture for adding new products; worked with behavioral analytics.
- **Entries to investments +11%** after the home-screen redesign; **−12% drop-off** at investment-product checkout; reduced average time-to-purchase. iOS & Android.

BARS Group Oct 2018 – Jun 2020
Product Designer · Kazan

- Redesigned a Medical Information System deployed across **12 Russian regions** for **10,000+ users**; researched workflows for 7+ professional roles and adapted the UI per role.

- **−10%** average time on routine scenarios (admission, discharge); positive design feedback in 3 of 5 pilot regions; reduced staff onboarding.

PET PROJECTS

- **AI design-system linter (Figma plugin)** — reads connected libraries into a JSON source of truth, auto-fixes spacing/color/component drift, and generates local tokens and components. Won a hackathon among developers.
- **Custom Haptics iOS app** — rebuilt via Figma MCP → Cursor → Xcode into a working build; preparing an App Store release.
- **AI audio guide** (Replit + Gemini) — recognizes a landmark from a photo and narrates its story, with geo and device-orientation matching; prototyped on-device.

EDUCATION

M.Sc. in Electronics & Microelectronics — Kazan National Research Technical University (KNRTU-KAI) · 2018

LANGUAGES

Russian — Native · English — B1 (Intermediate)
