Portfolio: artemiskandirov.github.io/portfolio

Senior Product Designer with 7+ years in EdTech, retail AI, fintech and medtech. I own design systems, gamification and sound UX in products used by millions, and ship changes that move metrics. I also design and build products end to end with AI tools — from a web platform to iOS apps and a hardware pet.

Experience

Uchi.ru · VK EdTech
Sep 2023 – Present

Senior Product Designer · Moscow, remote

- Redesigned the purchase flow; it won the A/B test: **ARPU +5%, conversion +7%**.
- Shipped social features for kids that lifted product **DAU by 8%**.
- Ported the design system to React components in Replit — the whole design team now prototypes there, often without Figma.
- Consolidated a sprawling legacy and A/B-test color system into tokens with AI (Cursor + Claude) in ~3 hours instead of days.
- Own gamification, multimodality and sound UX (voiceover, sound design) in a product used by millions of kids.

Miry Avi
2024 – Present

Senior Product Designer · Part-time

- Gamification and UX for a kids' speech-therapy app on iOS and Android.

Ailet
Jun 2021 – Sep 2023

Product Designer · Moscow

- Designed the analytics web platform and the mobile field app of an AI-vision retail SaaS used by P&G, Coca-Cola and Mars.
- Ran in-store UX research with supervisors, merchandisers and auditors; introduced UX metrics into delivery.
- After the redesign: **CSAT/CSI +5 pp**, interface-related support tickets **−8%**.

Ak Bars Digital Technologies · fintech
Jun 2020 – Jun 2021

Product Designer · Kazan

- Designed the investments section of the banking app (iOS & Android) and a scalable UI architecture for new products.
- After the home-screen redesign: entries to investments **+11%**, checkout drop-off **−12%**, shorter average time to purchase.

BARS Group
Oct 2018 – Jun 2020

Product Designer · Kazan

- Redesigned a medical information system used in **12 regions by 10,000+ staff**; researched 7+ roles and adapted the UI per role.
- Routine scenarios (admission, discharge) **−10% time**; positive design feedback in 3 of 5 pilot regions; faster staff onboarding.

Projects

- **SobesHub** (2026, sobeshub.ru) — interview-prep platform for data and product analysts: 2000+ real questions, 70+ companies, 200+ full interviews. Full-stack development and UI/UX design: Next.js, React, REST API, Cloudflare Workers, encrypted video, payments.
- **KODO** (2026) — a tangible pet for the car on ESP32: reads speed, RPM, throttle and braking over OBD-II and Bluetooth and reacts with eyes drawn in code at 30–45 FPS; gyroscope reactions.
- **Figma Linter** — AI plugin that binds layouts to design-system tokens and swaps detached components. **1st place** at a developer AI hackathon.
- **Also:** Buzzlab, my first iOS app (custom haptics, Figma MCP → Cursor → Xcode) · Lotion, Figma plugin that animates an icon from a text description into Lottie · Famager, AI family quests for iOS · CueLab, 94 UI sounds and haptics for Uchi.ru · talk on sound UX at Chulakov Design Meetup.

Skills

Design	Product design, UX/UI, design systems, prototyping, interaction design, gamification, sound UX, haptics
Research & data	UX research, A/B testing, product analytics
Tools	Figma, FigJam, Framer, Sketch, Photoshop, Illustrator, After Effects, Lottie, Spline, Blender
AI & code	Cursor, Claude, Replit, Figma MCP, React, Next.js, Xcode, SwiftUI
Process	Jira, Confluence, Notion, Miro

Education & languages

Education	Kazan National Research Technical University (KNRTU-KAI): **M.Sc., Electronics and Microelectronics**, 2018 · **B.Sc., Nanotechnology**, 2016
Languages	Russian — native · English — B1, intermediate
